

The Nitric Oxide Rescue Guide: 5 Signs You're Running on Empty (And How to Fix It)

This free guide reveals the 5 warning signs that your nitric oxide levels are critically low, plus 3 simple foods you can eat today to start boosting production naturally.

Why You Need Nitric Oxide

Nitric oxide is the 'youth molecule' your body uses to keep blood vessels open, oxygen flowing, and your brain firing on all cylinders. But here's the scary part: Research shows that by age 70, your nitric oxide levels drop by a whopping 75%. By 80, they're down by 85%. This dramatic decline is the hidden cause behind: • Fatigue that keeps you from activities you love • Blood pressure concerns your doctor keeps monitoring • 'Senior moments' and frustrating memory lapses • Reduced intimacy and performance in the bedroom • Joint discomfort that limits your independence • Cold hands and feet from poor circulation When nitric oxide plummets, you don't just feel older – your body literally starves for oxygen and nutrients.

The MIT Breakthrough That Changes Everything

MIT scientists discovered that nitric oxide production starts in your mouth. It's the bacteria on your tongue that convert nitrates into nitric oxide. That's the first and most important step. That's why CircO2 comes in fast-dissolving lozenges. You place one on your tongue, and within minutes it kickstarts nitric oxide production. In clinical testing, this method raised nitric oxide levels 200% within 20 minutes. And it increased blood flow by a staggering 34%. No pill or capsule can achieve these results.

3 Energy-Enhancing Nutrients

****#1 Beet Root Powder**** – Rich in natural nitrates that help open up blood vessels, improve oxygen flow, and supercharge your stamina. A favorite of Olympic athletes. ****#2 Hawthorn Berry**** – Used for centuries to support the heart, now known to enhance nitric oxide absorption so your body gets more out of every dose. ****#3 L-Citrulline**** – Converts to nitric oxide more effectively than L-arginine, especially if you're over 45. Supports circulation, blood pressure, memory, and sexual performance. Plus Vitamin B12 (boosts energy and nerve health), Vitamin C (catalyst for nitric oxide production), and Magnesium (relaxes blood vessels and regulates heart rhythm).

How CircO2 Transforms Your Daily Life

People who take CircO2 report: ✓ Renewed energy and stamina to stay active without afternoon fatigue ✓ Sharper thinking and recall – remember names and maintain your mental edge ✓ Healthier blood pressure readings that will impress your doctor ✓ Enhanced mobility and comfort as joints receive more oxygen ✓ Improved intimacy and performance through better blood flow ✓ More restful sleep and waking refreshed ✓ A sense of youth and vitality as your brain and body receive optimal oxygen
