

# 7 Warning Signs Your Nitric Oxide Levels Are Dangerously Low

Discover the 7 subtle signs that your nitric oxide levels have crashed—and the simple 20-second ritual that can restore them in minutes. This free guide reveals why traditional supplements fail and how to activate your body's natural nitric oxide production.

## Why Your Nitric Oxide Levels Are Crashing

Nitric oxide is the master molecule that controls circulation, energy, memory, and vitality. But as you age, your body produces less and less of it. This dramatic decline is the hidden cause behind the fatigue, memory lapses, cold hands and feet, joint discomfort, and reduced intimacy that so many people accept as 'just getting older.' When nitric oxide plummets, your body literally starves for oxygen and nutrients.

## The MIT Breakthrough That Changes Everything

MIT scientists discovered that nitric oxide production doesn't start in your stomach—it starts in your mouth. The bacteria on your tongue convert nitrates into nitric oxide. That's why CircO2 comes in fast-dissolving lozenges. You place one on your tongue, and within minutes it kickstarts nitric oxide production. In clinical testing, this method raised nitric oxide levels 200% within 20 minutes and increased blood flow by 34%. No pill or capsule can achieve these results.

## How CircO2 Transforms Your Daily Life

People who take CircO2 report renewed energy and stamina to stay active without afternoon fatigue, sharper thinking and recall to maintain their mental edge, healthier blood pressure readings, improved mobility and joint comfort, enhanced intimacy through better blood flow, more restful sleep, and a renewed sense of youth and vitality as their brain and body receive optimal oxygen and nutrients.

## 3 Powerful Energy-Enhancing Nutrients

CircO2 combines Beet Root Powder (rich in natural nitrates for Olympic-level stamina), Hawthorn Berry (enhances nitric oxide absorption and supports heart health), and L-Citrulline (converts to nitric oxide more effectively than L-arginine, especially after age 45). Plus Vitamin B12, Vitamin C, and Magnesium to multiply the benefits.
